PROFESSIONAL SUMMARY

Detail-oriented Senior QA Engineer with 12+ years of progressive experience in quality assurance, test automation, and data validation. Proven track record in building robust testing frameworks, leading QA teams, and implementing end-to-end quality strategies that enhance product reliability. Specialised in database testing, ETL processes, and API validation with strong expertise in storage solutions and containerisation. Currently expanding knowledge in AI/ML technologies including LLM fine-tuning and GenAI solutions to augment testing capabilities.

TECHNICAL SKILLS

Testing & Automation: Test Strategy & Planning, Automated Testing Frameworks, API Testing, Performance Testing, Selenium-based Testing, ETL Pipeline Design & Testing, Data Validation Frameworks, Synthetic Data Generation

Infrastructure & Development: Python, GitHub, Airflow, Pandas, Faker, Storage Solutions, Linux & AWS Cloud Platform, Shell Scripting, Docker, CI/CD Pipeline Management,

AI/ML Technologies: LLM Fine-tuning & Implementation, Generative AI Tools & Testing, LangChain, N8N Workflow Automation

PROFESSIONAL EXPERIENCE

SENIOR QA ENGINEER – Sequoia Group (Aug 2022 – Present)

- Defined **QA strategy for ETL validation** across multiple projects, reducing data defect leakage by 35%.
- Led and **mentored a team of 4 QA engineers**, introducing code review standards that improved automation reliability.
- Designed & implemented **synthetic data generation** tool using OpenAI API, boosting test coverage by 40%.
- Directed **migration initiatives from legacy systems to advanced ETL platforms**, ensuring zero critical defects post-migration.
- Built **scalable QA pipelines using Airflow, Faker, and Pandas**, cutting data validation time by 30%.
- Engineered end-to-end **UI automation framework using SeleniumBase with pytest**, implementing Page Object Model (POM) to ensure clean, modular, and scalable automation code.
- Automated **regression suites** for HRIS, Benefits, Integration, and Data Mapping modules; validated both UI workflows and underlying **API/ETL data flows for maximum test coverage**.
- Integrated **UI automation with CI/CD pipelines**, enabling continuous validation of cross-system functionality across web, API, and ETL layers.
- **Collaborated with product and engineering teams** to align QA deliverables with business goals, influencing release decisions.

SENIOR QA ENGINEER – Huawei Technologies (Dec 2019 – Aug 2022)

- **Drove QA automation** strategy achieving 92% automation coverage for Application Migration Module, improving release velocity.
- Engineered an automated **API testing framework** that reduced regression cycle time by 50%, enabling faster product rollouts.

- Partnered with product owners & developers to **prfioritize test cases and reduce regression time** by 35%.
- Automated **SQL extraction progress modules in the UI**, validating real-time command outputs, result mapping, and count accuracy **against backend ETL transformations**.
- Developed **regression automation for SQL query conversions** (Oracle → GaussDB, MySQL → GaussDB, PostgreSQL → GaussDB), validating both backend schema transformations and UI visualisation of results.
- Built and **maintained UI test suites for Application Migration SQL** components (extraction, transformation, schema creation), ensuring synchronisation between UI workflows, API responses, and database validations.
- Acted as a mentor for junior engineers, leading code reviews and automation best practices.

SOLUTION ENGINEER – Datagres Technologies (Jun 2018 – Dec 2019)

- **Architected containerised** solutions with Docker/Kubernetes, improving deployment efficiency by 60%.
- **Led requirement gathering** for Resource Orchestrator Solution, improving utilisation by 30%.
- Deployed PerfAccel on AWS, GCP, Oracle Cloud environments.
- **Developed testing frameworks** for NoSQL/Oracle 12c integration using Python scripts.

SENIOR PROJECT ENGINEER – Wipro Limited (Mar 2013 – Feb 2018)

- **Proposed and implemented enterprise storage solutions** optimising IOPS and client systems.
- Executed **comprehensive test plans** reducing post-deployment issues by 40%.
- Contributed to LLD design for HP 3PAR, NetApp, and IBM storage solutions.
- Earned multiple Best Technical Individual Awards & Six Sigma recognition.

EDUCATION

- MS Information Technology, VIT University, Vellore – Mar 2017
- BSc Computer Science, KSR College of Arts of Science, Tiruchengode – Mar 2012

ACHIEVEMENTS

- Future Star Award – Huawei (2020)
- Best Technical Individual Award – Wipro (Multiple Years)
- Top Performer Award – Sequoia Group (2023)
